

Sulky

Rider Attachment For Battery Burnishers

The Sulky attachment on NSS battery burnishers allows the operator to ride behind the burnisher, increasing productivity. This optional attachment is perfect for burnishing large, open areas.

- The Sulky provides rider-like productivity without the expense and maintenance of a ride-on burnisher.
- The Sulky flips up for walk-behind operation, and for fitting in areas that limit maneuverability. This means the NSS battery burnisher can be used in areas that ride-on burnishers cannot go.
- Designed for the new generation of NSS battery burnishers, the Sulky can be attached to the “slant-top” Charger 2717 DB and the new Charger 2022 DB.
- Highly maneuverable—with the Sulky attached, the Charger 2717 DB has a turning radius of 76 inches. The Charger 2022 DB has a turning radius of 72 inches.

Factory Install

The Sulky is available as both a factory install and field install attachment. For the factory install models, order the following part numbers: Charger 2022 DB with 225 AH batteries and Sulky, part number **64-0-202-6**.
Charger 2717 DB with 325 AH batteries and Sulky, part number **64-0-273-4**.

To order field-install kits for “slant top” burnishers **with** pre-drilled holes in the back of the control panel, use part number **64-9-715-9**.

To order field-install kits for “slant top” burnishers **without** pre-drilled holes in the back of the control panel, use part number **64-9-712-9**.

The Sulky is **not available** for NSS battery burnishers with a “flat top” battery box.

Pre-drilled holes

Sulky Specifications

Construction

Body	10-gage steel
Wheels	4 in (10 cm) wheels w/ urethane grip

Dimensions

Length	27.5 in (70 cm)
Width	20.5 in (52 cm)
Height	4.25 in (11 cm)

Weight 24 lbs (11 kg)

Weight Limit 350 lbs (159 kg)

Warranty 3 years limited

DO NO HARM™

The Sulky attachment allows the operator to ride behind the machine, ergonomically reducing operator fatigue.

The Sulky is made from recycled steel and is recyclable.

For more information on the NSS commitment to the environment, please request the NSS "Do No Harm" brochure.

- 1 4-in diameter wheels roll easily across the floor, providing a smooth ride.
- 2 10-gage steel body provides a stable, sturdy base for operators.
- 3 Foot pads on the standing surface of the Sulky prevent accidental slipping.
- 4 The Sulky attaches in minutes to both the "slant-top" Charger 2717 DB and Charger 2022 DB.
- 5 The entire Sulky flips up so it can be latched to the back of the battery burnisher for standard walk-behind operation. For safety reasons, the Sulky must be flipped up to operate the burnisher in reverse.

With the Sulky flipped down, the NSS Charger battery burnishers provide a notable increase in productivity.

The Sulky flips up 90° from the operating position, allowing the operator to burnish in tight areas.

A sturdy, dependable latch holds the Sulky in the "up" position during walk-behind operation.
