

Rally 1200

12-Gallon Dual Surface Cleaner

Feature

Benefit

Versatility

The Rally 1200 allows tile and grout cleaning, and restorative carpet cleaning from the same machine.

Grout Cleaning

When used with the hard surface rotary tool, two 1200-PSI streams quickly clean away the toughest soils from hard floors. The twin streams of 1200 PSI water turn the spray bar at 1400 RPM, providing consistent cleaning, even in grout lines.

Hard Floor Productivity

Two 0.75 garden hose fittings allow for auto-fill and auto-dump of the solution water, increasing productivity and eliminating trips to the sink to fill or drain the machine.

Carpet Cleaning

Dial the pressure down to 500 PSI and attach a carpet wand, and the Rally 1200 becomes a powerful cold water restorative carpet extractor.

Dual Vacuum Motors

The dual vacuum motors produce 140 inches of water lift, which assures consistent, smooth operation.

Construction

Rotomolded polyethylene body and tanks won't dent, crack, or corrode.

Clamshell Design

Maintenance is a breeze—just remove one bolt and open up the clamshell design for quick internal access.
