

Rally 55 and 55H

2.9-Gallon Carpet Spotter

Feature

Benefit

Long Runtime

The Rally 55 and 55H Carpet Spotters have large tanks, keeping these spotters on the job longer than smaller capacity machines, increasing productivity.

Casters & Handle

2-wheel transport wheels and an integrated, slide-away handle team up for easy transportation from spot-to-spot.

Removable Recovery Tank

The recovery tank can be easily removed and carried to a sink or drain for quick, effective emptying.

1850-Watt Heater

The 1000-watt heater (on the 55H model) keeps a steady supply of hot water available. For best results, an “8-seconds on, 8-seconds off” spraying pattern is recommended.

Construction

Rotomolded polyethylene body and tanks won’t dent, crack, or corrode.

Tank-Over-Tank Design

The tank-over-tank design keeps the machine balanced throughout operation, providing a stable base.
